SUMMARY

Second-year CSE undergraduate at BMS College of Engineering, with hands-on experience building full-stack web and cross-platform mobile applications using AI integration. Looking for software development internship opportunities.

EDUCATION

Bachelor of Engineering(B.E), BMS College of Engineering, Bengaluru. Expected 2028
CGPA: 8.67

Relevant Coursework:

Data Structures, Database Management Systems, Analysis & Design of Algorithms, Operating Systems.

Pre-University(PCMC), Poornaprajna PU College, Udupi. 2022 - 2024
Grade: 398/400

SKILLS

Technical Skills	JavaScript, TypeScript, React, React Native, Node.js, Express.js, MongoDB, Firebase, Git, GitHub.
Soft Skills	Self-taught, Detail-oriented, Self-motivated, Strong Verbal Communication, Proactive.
Languages	C, C++, Python.
Tools & Platforms	VS Code, Android Studio, Expo EAS, Vercel, Railway, MongoDB Atlas.

PROJECTS

1.ConquerONE — AI Fitness Mobile App 2026 – Present
React Native, Expo, Firebase, Gemini AI, Google Health Connect [GitHub](#) — *Android & iOS*

- Built a production-ready fitness app featuring a 6-day dumbbell-only program with automated workout tracking, streak system, and rank progression across multiple levels.
- Integrated Gemini AI coaching engine with automatic multi-model fallback across 6 models, ensuring 100% uptime with graceful offline responses when API is unavailable.
- Implemented Google Health Connect integration for real-time health data sync, push notifications, and OTA updates via Expo EAS across development, preview, and production channels.

2.ElevateX — Gamified Skill Marketplace (Web + Mobile) 2025 – Present
MERN Stack, React Native, Expo, TypeScript, Socket.io, TanStack Query [GitHub](#) — *Web, Android & iOS*

- Engineered a full-stack gamified marketplace with a shared backend serving both a React web app and a cross-platform mobile app, featuring JWT authentication, XP progression, leaderboard system and subscription system with Razorpay integrated.
- Built real-time chat system with Socket.io supporting message reactions, typing indicators, WhatsApp-style read receipts, and media uploads up to 200MB with progress tracking.
- Developed Instagram-style social feed with follow system, personalized content, likes, comments, and backend-validated messaging restrictions using Express.js and MongoDB.
